@TANTALUSLABS

TANTALUS

Tantalus Labs produces high-quality cannabis products using sustainable cultivation methods.

We believe world-class cannabis is the result of:

elite genetics,

pure inputs,

and disciplined cultivation.

To cultivate world-class cannabis, Tantalus Labs spent 4 years designing and building a unique greenhouse in the Fraser Valley near Vancouver, BC.

We call it SunLab¹.

PRODUCTION - SKY PILOT

HOW WE GROW:

RAINWATER

FULL SPECTRUM LIGHT

ELITE GENETICS + STRAIN SELECTION

Our operations are based out of the Fraser Valley in British Columbia, where rainfall is abundant. That is why we designed and equipped the roof of SunLab¹ with a rainwater catchment system for our greenhouse irrigation.

Using 100% captured and triple-filtered rainwater means our water-usage is sustainable. And produces clean-burning, quality cannabis.

WATERING LINES / VEGETATIVE BAY

HOW WE GROW:

RAINWATER

FULL SPECTRUM LIGHT

ELITE GENETICS + STRAIN SELECTION

Plants have thrived under sunlight for millions of years. The sun naturally provides full-spectrum light, an ideal photosynthetic input for cannabis.

Using sunlight as our main light source not only effectively fosters healthy cannabis plants but significantly reduces our environmental impact. We are able to reduce our carbon emissions by up to 90% compared to traditional indoor cannabis cultivation.

Tantalus is always looking to the future, optimizing growth and genetic rarity with each strain we produce.

R&D - PURPLE PUNCH

R&D - PURPLE PUNCH

HOW WE GROW:

RAINWATER

FULL SPECTRUM LIGHT

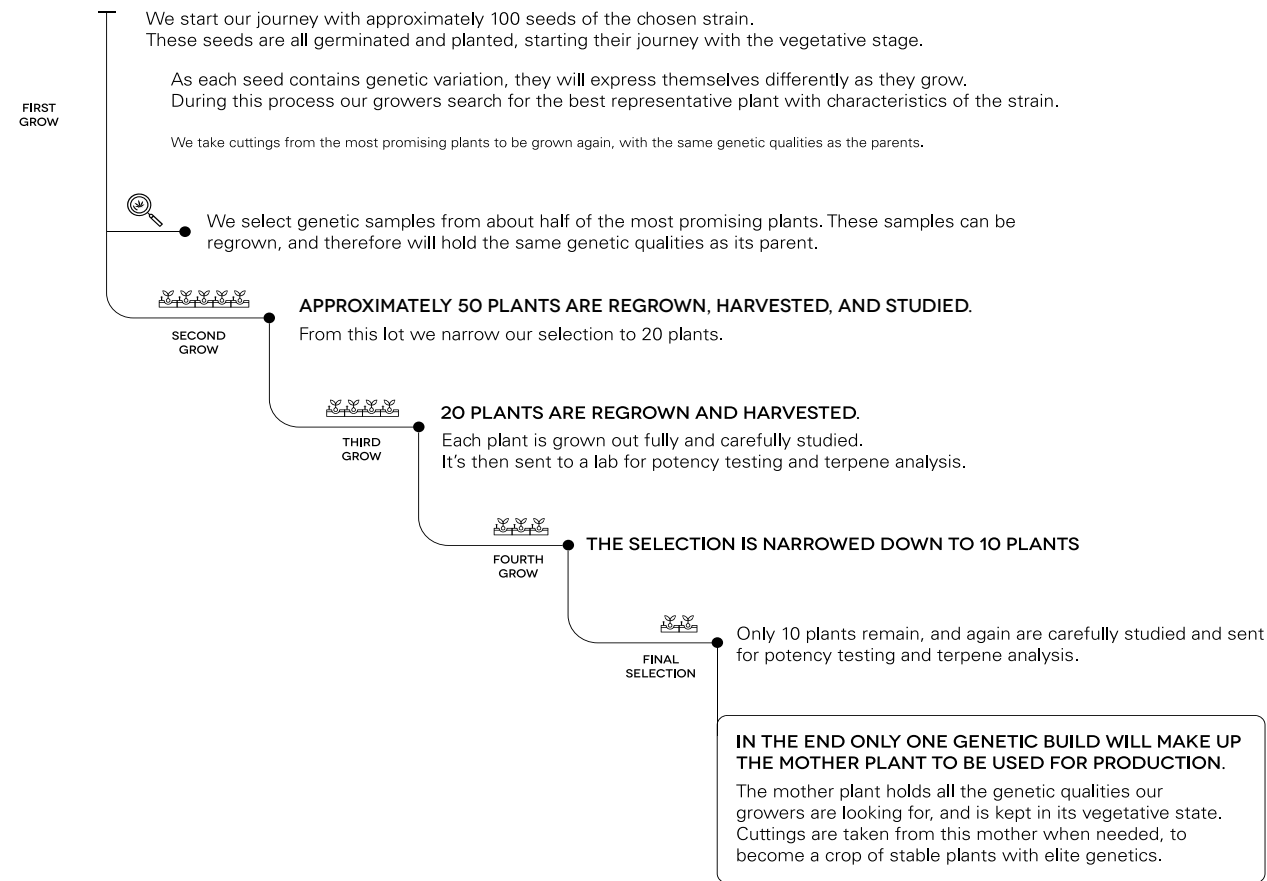

ELITE GENETICS + STRAIN SELECTION

Selecting a cannabis phenotype for cultivation is a meticulous 18 month process at SunLab¹.

Our team of experts look for the best physical expressions of a strain to narrow down the selection. Traits like potency, aroma, bud structure and density, as well as plant resiliency and health are isolated throughout four rounds of grow cycles. We select cuttings from the best half of each round and use potency testing to help determine the best phenotypes.

Our phenotyping process:

PRODUCTION - TROPICANNA COOKIES

Plants express vibrant non-green hues when they contain unique genetics. Anthocyanins, a type of flavonoid, are the naturally occurring pigments in foods and cannabis responsible for rich expressions of colour. Some cannabis strains contain higher levels of anthocyanin, and are uncovered in the search for rare genetics.

PRODUCTION - TROPICANNA COOKIES

2021 STRAINS

Nearing the end of 2020 we moved to an exclusively high thc product range, encompassing strains sought after for their complex flavours and potent highs.

Sky Pilot

INDICA

SKY PILOT IS A SWEET AND PUNGENT INDICA-DOMINANT STRAIN, SELECTED EXCLUSIVELY BY TANTALUS LABS FROM A BLUE DREAM X SNOW LOTUS CROSS.

Aptly named after the prominent Sky Pilot peak in the Tantalus Mountain Range, this high THC strain features large buds with an ultra-frosted appearance. The scent of blueberry with hints of spice and pine make for a familiar diversion from the classic Blue Dream strain.

Pacific OG

SATIVA

PACIFIC OG IS A SATIVA DOMINANT HYBRID, A TANTALUS CURATION OF GOJI OG, BRED FROM NEPALI OG AND SNOW LOTUS.

Nepali OG, aka Nepali Kush, is a long-lineage classic close to Tahoe OG that brings conical-shaped buds and earthy notes of an OG aroma, while Snow Lotus lays an undercurrent of black cherry and subtle hints of liquorice. The colas of Pacific OG are caked, hand-harvested, and cured, providing a full flavour due in part to dominant terpenes of pinene and nerolidol.

L.A. KUSH CAKE

L.A. KUSH CAKE HYBRID

LA KUSH CAKE IS A CAKED OUT HYBRID STRAIN BRED FROM COMBINING KUSH MINTS AND WEDDING CAKE.

The Tantalus curation of LA Kush Cake was selected from a cake leaning phenotype during a larger than average seed hunt. It carries a classic OG taste of gas and diesel, along with subtle sour notes. The flower is dense green with hints of purple, and true to its name, large nugs are caked up with frost.

TROPICANNA COOKIES

TROPICANNA COOKIES SATIVA

TROPICANNA COOKIES IS A CROSS OF GSC AND TANGIE, RESULTING IN A CITRUS AND COOKIE FLAVOURED MASHUP.

Tantalus' Tropicanna Cookies strain was selected from popping F2 seeds, and this specific phenotype has a remarkably wild expression of colour. Buds are rich purple with some green hues, covered by prominent overlapping orange hairs. The scent hits strong with an orange citrus start, followed by a backing of smooth cookie flavour.

MENDO PURPS

MENDO PURPS INDICA

MENDO PURPS IS A VIVID PURPLE INDICA RESULTING FROM A CROSS BETWEEN MENDOCINO PURPLE AND PURPLE URKLE.

Mendo Purps, aka Mendocino Purps, or simply The Purps, contain genetics that hail from the famous Mendocino County in Northern California. It's a strain which matches a purple hue with an intense artificial grape-syrup flavour. This sweet expression of terps is supported by lingering fruity notes. Expect rich purple buds with a strong covering of frost as the result of two legendary strains combined into one.

MORE COWBELL

MORE COWBELL HYBRID

MORE COWBELL IS A HYBRID CROSS OF GSC AND 88/G13 HASH PLANT.

Originally bred by Bodhi Seeds, Tantalus curated this phenotype of More Cowbell to deliver a balance between the traits of both hash plant and cookies. This cultivar provides large dense buds with a pointed silhouette, and contains above average resin content to provide a hashy, cookie flavour with undertones of gas.

SLURRI CRASHER

SLURRI CRASHER INDICA

SLURRI CRASHER IS A HEAVY HITTING INDICA FROM A GENETIC CROSS OF SLURRICANE AND WEDDING CRASHER.

The combination of two well-celebrated strains has created Slurri Crasher, a strain pulling flavours and bag appeal from both. Tantalus has curated this strain to present dense colourful flowers with an intense turpentine smell. The taste has notable lemon mixed with gassy fuel aromas.

SUNSET SHERBERT

SUNSET SHERBERT INDICA

SUNSET SHERBERT IS A POTENT INDICA STRAIN, BRED FROM CROSSING THE POPULAR GSC (GIRL SCOUT COOKIES) AND PINK PANTIES.

Tantalus' Sunset Sherbert is unique because it's a backcross (BX1). It was bred by crossing the Sunset Sherbert strain back with itself, to achieve a further stabilized expression of the desired traits. These traits include a sweet sugar aroma mixed with berries and gas, along with dense frosted nugs in a rainbow of purple, green, and orange colour.

PRE-ROLLS

Quality Ground Flower,
Conveniently Pre-rolled.

Tantalus Labs pre-rolls
are available in the same
exclusive strains as our
whole flower.

Each pre-roll is 0.5
grams each, and they are
available in packs of 3.

WHOLE BUD, PRE-ROLLED FOR YOU

Cannabis plants naturally
produce buds of varying
sizes. For a bud to make it
into our flower packaging, it
needs to be of a certain size.
Smaller buds have the same
cannabinoid and terpene
profiles, but are just a smaller
package. We use these
smaller buds as input to our
pre-roll products.

A PIPE AND FLOWER IN ONE PACKAGE

JW and Tantalus Labs have collaborated to create an all new pre-packed pipe.

Choose between two of Tantalus Labs' best selling strains Blue Dream or Pacific OG.

DURABLE & PORTABLE

Ready for action wherever you go.

Durable pharmaceutical grade glass provides a personal pipe for clean consumption.

DRY SIFT

Quality Inputs

We use our flower produced at SunLab as the foundation for our concentrates.

High THC

Our Dry Sift is produced by tumbling flowers to detach the trichome from the plant. The material is then passed through screens to purify. By using quality flower inputs, our result is a potent and pure THC product.

Flash Frozen Processing

By freezing flowers before the tumbling process, we allow trichomes to break free more easily, resulting in a pure end product.

TC HASH

TC hash is a potent pressed hash with a sweet and tropical flavour profile.

TC Hash is made from pressed high-purity dry sift, resulting in a soft square of high-quality hash. It's a solventless concentrate that is made with strains selected for their citrus and tropical forward flavours.

This hash can be added to flower to increase potency, or consumed on its own.

2020 STRAINS

In late 2019 and 2020 we entered the market with a focus on a balanced strain portfolio, from high cbd strains, to balanced, to high thc - we wanted to start with something for everyone.

SKUNK HAZE

Cannatonic

Cannatonic

SATIVA

CANNATONIC IS A RENOWNED CBD DOMINANT STRAIN, KNOWN FOR STARTING A REVOLUTION IN CBD SPECIFIC GENETICS FOR THOSE SEEKING BENEFITS OF HIGH CBD WITH LOW TO NO PSYCHOACTIVE EFFECTS.

Cannatonic is the result of crossbreeding Reina Madre with New York City Diesel (NYCD), which provides varied phenotypes ranging from high THC to high CBD. Tantalus selected our Cannatonic to target a 1:18 cannabinoid profile, reflecting the desired ratio for CBD enthusiasts. Expect this 50/50 indica sativa cross to have dense resin coated buds showcasing notes of citrus and pine.

Harlequin

Harlequin

SATIVA

BEFORE TODAY'S HYPE OF CBD STRAINS, THERE WAS HARLEQUIN - A CBD RICH STRAIN WITH VERY LOW THC. THE GENETIC MAKEUP OF THIS PLANT IS A PATCHWORK OF 1970'S COLUMBIAN, THAI, AND NEPALI INFLUENCES WHICH CREATES A SATIVA LEANING PLANT.

Tantalus selected from the diverse genetic heritage and expression of this plant, to provide a balanced THC and CBD profile. Our Harlequin combines the original Harlequin strain, crossed with The Ox, resulting in a 1:2 THC/CBD, go anywhere strain.

Expect rich forest green buds with brushed red pistil hairs, providing scents of cherry, citrus, and honey.

Skunk Haze

SATIVA

SKUNK HAZE COMBINES TWO PILLARS OF CANNABIS HISTORY, SKUNK AND HAZE. SKUNK IS KNOWN AS A SWEET CITRUS INDICA, AND HAZE IS A STRAIN DEVELOPED FOR HEADY UPLIFTING CHARACTERISTICS.

Tantalus used this diverse genetic lineage to select a Skunk Haze plant with a 1:2 ratio of THC to CBD, exhibiting indica looking buds with sativa-like effects. With notable THC and CBD present, and both indica and sativa roots, this strain strikes a balance. Terpenes allude to flavours of cherry and sweet citrus.

Blue Dream

SATIVA

BLUE DREAM'S HERITAGE IS A COMBINATION OF BLUEBERRY INDICA AND SATIVA HAZE. THIS FLOWER IS SATIVA LEANING, WITH SWEET BLUEBERRY FROSTING, SUITABLE FOR EUPHORIC AND CALMING DAYTIME USE.

The Tantalus Labs Blue Dream was selected from traditional genetics, and crossed to increase the bud structure and frost, while maintaining the expected fruitful taste. First developed in California, it has become a West Coast staple since its introduction.
